Present Position

- Clinical Professor of Radiology and Clinical Neurosciences, University of Calgary
- Heart and Stroke Foundation Chair in Stroke Research
- Staff Neuroradiologist (Diagnostic and Interventional Neuroradiology), Foothills Medical Centre, Calgary
- Director, Imaging and Intervention, Calgary Stroke Program
- Partner, EFW Radiology
- Fellow, American Heart Association
- Fellow, Canadian Association of Radiology
- Fellow, European Stroke Organization
- Fellow, Canadian Academy of Health Sciences

Summary

Peer Reviewed Manuscripts: 285 (including NEJM, Lancet Neurology, Radiology, Circulation, ANJR, Stroke).

Editorials: 29

Abstracts: >300

Invited Lectureships: >180

International Scientific Meetings organized: 4

Citations: 39177

GRANTS

- PI ESCAPE trial (published in NEJM)
- PI SWIFT-PRIME trial (published in NEJM)
- Co PI PROVE-IT study (funded by CIHR)
- PI and Chair: HERMES (meta-analysis of the 5 recently published NEJM papers, published in Lancet)
- PI: ESCAPE NA1 (published in Lancet)
- PI: UNMASK EVT: a study in stroke decision making
- Co PI EVOLVE study (funded by CIHR)
- Co PI TEMPO 2 (funded by CIHR)
- Co PI ESCAPE NEXT
- PI ESCAPE MeVO (funded by CIHR and industry)

Awards (recent)

- Outstanding contributions in research award: American Society of Neuroradiology; 2020
- Lifetime contribution award: Canadian Association of Radiology; 2018
- ASTECH (Alberta Science and Technology) Innovation Award: 2017
- President's Excellence Award: Research 2016. Alberta Health Services
- Researcher of the year: Clinical faculty. Cumming School of Medicine. 2015
- Contributions to Innovation in the field of Neurointervention. Society of Vascular and Intervention Neurology, 2015.

Education and teaching

- Chair of the Calgary Stroke Program 5T course (Teamwork, Technique, Transport, Technology and Training)
- Founder aspectsinstroke.com (free online educational website on acute stroke imaging; over 5000 registered users from 48 countries)
- Worldwide teaching network; visiting professor in more than 25 countries and more than 100 stroke centers

Innovation

- Developed a new technique for efficient stroke imaging: multiphase CTA. This was used in the ESCAPE trial.
- Developed an Acute Stroke Kit (BRISK: Brisk Recanalization Ischemic Stroke Kit) which has now been widely implemented across Canada
- Developed a mathematical model for decision making in acute stroke
- Developed a new combined mechanical thrombectomy technique (BALloon guide with large bore Distal access catheter with Dual Aspiration with Stent-retriever as Standard Approach [BADDASS])

Professional contributions and responsibilities:

- Member of Canadian Society of Neuroradiology
- President of Eastern Neuroradiology Society 2005

- Member of Canadian Stroke Consortium
- Senior Member of Society of Neurointerventional Surgery
- Member American Stroke Association
- Member Radiological Society of North America
- Member of Canadian Neuro-Interventional Group (CING)
- Member of American Society of Neuroradiology (ASNR)
- Member, Neuroradiology focus group setup to investigate the future of Interventional Neuroradiology in Ontario by the Ontario Council of teaching Hospitals
- Elected treasurer of Eastern Neuroradiological Society for 2002-2003.
- Elected vice-president of Eastern Neuroradiological Society for 2003-2004.
- Organized a 'Workshop on Neurointervention' in December, 1996 at the Department of Neuroradiology, All India Institute of Medical Sciences; New Delhi. It included lectures on various topics of Interventional Neuroradiology and live demonstration of cases.
- Editorial board: Stroke
- Founding editor of section on 'Solutions and Innovations' in journal Stroke
- Editorial board: Neuroradiology
- Fellow of American Heart Association

Knowledge Translation

- Multiphase CTA. This is a technique of imaging of acute stroke patients developed by me. Subsequently it was used in the ESCAPE trial and has shown usefulness in acute stroke decision making in multiple ways: a. Saves approximately 20 minutes as compared to an imaging algorithm based on CT perfusion (Time is brain in acute stroke) b. is less vulnerable to patient motion c. can be performed on any CT scanner d. does not require complex post-processing and e. potentially leads to better decision making. This technique is now being used at many stroke centres across Canada and is slowly spreading across the world with implementation in South Korea, Spain, India etc.
- Stroke Kit: BRISK (Brisk Recanalization Ischemic Stroke Kit). This was a methodology I developed to pre-organize the angiography suite that leads to more efficient workflow during treatment of an acute stroke patient. Once we were comfortable with it in Calgary, in the process of running the ESCAPE trial I implemented this across the ESCAPE sites in Canada. Consequently, of all the acute stroke trials, ESCAPE was by far the fastest. This has now been implemented in South Korea as well.
- Escapetrial.org. This is a website we developed at the end of the ESCAPE trial. The trial was widely covered in the media including in the Wall Street Journal. As a consequence, because of the level of interest and the number of questions, we developed this website that provides all the educational material including slides, protocols, results, publications and techniques.
- Aspectsinstroke.com. I developed this educational website to train other sites and stroke centres on how to effectively and accurately interpret acute stroke imaging using the ASPECTS score (that was also developed in Calgary) and collateral imaging.
- 5tstroke.ca. I am the chair of this Calgary Stroke Program stroke course. The first one is in Banff in Feb 2016. We are expecting a worldwide audience. One of the main purposes is knowledge translation: teach other centres all that we have collectively learnt during the running of the ESCAPE trial and effectively manage acute stroke patients.

- Member of the Provincial committee to optimize stroke imaging (2015 onwards)
- Member of the HASTE project to optimize stroke workflow (2012 onwards)

Nationally and Internationally

1. Leading international trials/collaborations
 - a. ESCAPE
 - Worldwide randomized controlled trial
 - Published in NEJM
 - 22 sites
 - We managed an extensive continuous quality improvement program across all the 22 sites.
 - In addition, I led a training program across all the sites and helped each site achieve the aggressive time metrics set by the trial. As a consequence the workflow metrics in the trial were the fastest of all the recent trials and faster by over 3 hours compared to the older trials.
 - b. SWIFT PRIME
 - 39 sites across North America and Europe
 - Results published in NEJM

- Similar to ESCAPE, I ran an extensive quality improvement program for workflow and imaging across all the sites.
- c. SEER
- i. As a consequence of the ESCAPE and SWIFT PRIME (and other trials), there has been a change in the standard of care for acute ischemic stroke. Four of the recent trials (ESCAPE, REVASCAT, SWIFT PRIME, EXTEND IA) used the Solitaire device. I am spearheading a group to accomplish a patient level pooled analysis, that would help towards establishing the use of the newer generation stroke devices for acute ischemic stroke.
 - ii. . We have already put together the dataset from across 4 continents and over 10 countries and analyzed the data.
 - iii. Published in *Stroke*.
- d. HERMES
- i. There were five recent trials that showed the benefit of endovascular treatment. Four of these were stopped prematurely but still showed overwhelming benefit of endovascular treatment. Given the small sample size, the confidence intervals were quite wide for the sub-groups. This led to the creation of the HERMES collaboration to create a patient level pooled analyses to answer some of the unanswered questions. In addition, the pooling of data is also likely to allow a more detailed analysis of the importance of time and details of imaging criteria.
 - ii. I am chairing this collaboration. It has resulted in multiple high impact publications including in Lancet, JAMA, Lancet Neurology.
- e. UNMASK EVT
- i. In order to determine factors that influence the decision-making in acute ischemic stroke treatment, I used my international connections to lead a worldwide survey with more than 600 physicians that are involved in acute stroke care.
 - ii. The results have been published in numerous papers (see Appendix) and provided valuable insights for policymakers and hospital administrations
- f. DELPHI
- i. This was a worldwide expert group I initiated to develop a consensus statement for antiplatelet management for stent-assisted coiling and flow diversion in the setting of ruptured intracranial aneurysm treatment

- ii. The statement paper is in preparation and will be endorsed by numerous societies (SNIS, ESMINT, JSNET)
 - g. ESCAPE-ALICE
 - i. This was a survey I initiated with more than 200 participants in order to explore current treatment approaches in unruptured brain arteriovenous malformations and controversial stroke cases. The survey also identified current weak spots in neurovascular treatment infrastructures in different countries.
 - ii. The survey results have been published in numerous papers and created a basis for future discussion and a starting point for improvement of endovascular treatment infrastructures.
- 2. Providing core lab services to international trials/collaborations
 - a. IMS3
 - b. ALIAS2
 - c. ESCAPE
 - d. SWIFT PRIME
 - e. HERMES
 - f. ESCAPE NA1
- 3. Organizing conferences
 - a. Canadian Stroke conference
 - b. 5T stroke course
 - c. Calgary stroke program stroke course
 - d. SNIS stroke course
- 4. Advisor role to departments in Singapore, Beijing and Vietnam to help them organize acute stroke services.

Research Support:

TEMPO-2 - A randomized controlled trial of TNK-tPA versus standard of care for minor ischemic stroke with proven occlusion.

Granting Agency/Program: Canadian Institute of Health Research, Bridge funding.

Nominated Principal applicant: Shelagh B. Coutts

Principal Applicants: Michael D. Hill, Mayank Goyal

Co-applicants: Andrew Demchuk, Stefan Greisenegger, Peter Kelly, Bijoy Menon, Keith Muir, Mark Parsons

September 2016-2017

“Precise and Rapid assessment of collaterals using multi-phase CTA in the triage of patients with acute ischemic stroke for IA Therapy (PROVE-IT)”

Granting Agency: Canadian Institutes of Health Research (CIHR)

Status: Completed

Principal Investigator: B.K. Menon

Co-Principal Investigator: M. Goyal

Co-Investigators: A. Demchuk, M.D. Hill, R. Frayne, T. Sajobi, T. Lee

March 2014 to February 2017

“Identifying New approaches to optimize Thrombus characterization for predicting Early Recanalization and Reperfusion with iv tPA using Serial CT angiography (INTERRSeCT).”

Granting Agency: Canadian Institutes of Health Research (CIHR) (Bridge Funding)

Status: Completed

Principal Investigator: A. Demchuk

Co-Investigators: D. Dowlatahahi, M.D. Hill, M. Goyal, B. Menon

March 2012 to February 2014

“Endovascular treatment for Small Core and Anterior circulation Proximal occlusion with Emphasis on minimizing CT to recanalization times”

Granting Agency: Covidien

Status: Completed

Principal Investigator: M. Goyal, M. Hill

Co-Investigator(s): A. Demchuk, P. Barber, T. Watson, G Klein, S. Coutts, E. Smith, B. Menon, S. Subramaniam, M. Eesa, A. Mitha, W. Morrish, J.
