CURRENT RESEARCH INTERESTS

Out in the Cold: Canada's Arctic Policy: book project that discusses Canada's Arctic policy as a foreign policy best understood through constructivist analysis and by examining historical narratives of the region, specifically those that aim to construct national identities

The Many Stories of Energy: research agenda that highlights the human stories and histories of energy and discusses energy's place and role in societies, this includes a particular focus on women

Strukturwandel, Deindustrialization and Energy Transition: this research project conceptualizes structural change in the German Ruhr region as an energy transition from coal to oil and analyzes human agencies in this energy transition, which is experienced during

An International History of the 1970s Energy Crises: research project that traces the origins and emergence of the concept of energy security in a transnational and cross-national study

The History of Oil and Gas Exploration in Canada's High Arctic: research project that examines oil and gas exploration in an era when high modernism and economic nationalism coalesced in Canada and that examines experiences and narratives of local and Southern actors as they define the region as energy frontier, workplace or homeland
