Publications – Manuscripts

Career total: 100+ published manuscripts and submitted (Trainees are underlined), 2 invited book chapters, 13 online peer reviewed lay public articles, 7 manuals, 150+ abstracts and many knowledge translation and health education articles. Although research topics vary, all outcomes have health and physical activity intertwined with various factors (such as biometrics and blood biomarkers, built environment, epidemiology, injury risk, etc.). In general, they are related to a central *health theme of movement* in the form of physical activity, exercise, and sport participation. Some publications can be viewed here:

Hired in 1988: No start-up funds or mentorships. First female exercise and sport scientist within the Faculty of Physical Education. The name changed to Kinesiology and the program focus became research intensive in 1992.

Start of research career after the year 2000: a) education leave from July 1, 1992, to August 31, 1993, to begin Dr. PH LLU USA (completed course work and professional practice hours). The birth of our first child was during my education leave in the USA (Feb 14, 1993) but no maternity leave occurred. Completed research for my PhD data collection at UCalgary.

Interruptions: a) two 4-month maternity leaves for our 2nd and 3rd child (Jan.1 to May 6, 1996, and 1998) and b) three medical leaves -hand and other surgeries (Jan, 13 to April 6, 2000; July 1 to August 22, 2003; and Sept. 17-31, 2009).

Authorship: The order reflects each contributor's level of engagement, with the primary researcher or trainee listed first, followed by others in order of contributions, and the senior author—responsible for overseeing the work and guiding final decisions—listed last.

Signature Courses

- ¹³**KNES 433 Health and Physical Activity (Principal Lecturer):** Focus' on individual-based health behaviours and their application to lifestyle diseases. The lab component involves completion of and analysis on: blood lipids, %BF, BP, Framingham Health Risk Appraisal, RR (relative risk) of top 8 health behaviours by age, 3-day dietary record, mortality index ([Life Expectancy](#)), and Genetics-Family Tree. (1988-92, 94-99 and 01-02, 04-17, 18-21 F/W, 22F, W24). Note: this course has been adopted by several universities; including University of Prince Edward Island.

From: Breanna McDonald <breanna.mcdonald@ucalgary.ca>**Sent:** Tuesday, October 24, 2023 7:29 PM **To:** Patricia Doyle-Baker <pdoyleba@ucalgary.ca>

"Your passion and dedication for your field, as well as your extensive and research background, was very captivating for me as a student. Although challenging, *Health and Physical Activity* was my favourite course because it left me with a wealth of knowledge and an altered outlook on my life and the lives of those around me. KNES 433, through your instruction, empowered me to feel capable as a health provider, which led me to pursue physiotherapy through higher education."

- **KNES 493 Epidemiology of Physical Activity (Principal Lecturer):** Examines epidemiologic perspective of chronic disease relationships through the application of population-based research methods. (1995-99, 01-02, 04-13, 16,17).

Co-Direct/Taught Courses

- **KNES 203 Activity: Health, Fitness and Performance:** Sport science is a discipline that studies how the healthy human body works during exercise and how physical activity promotes health from cellular to whole body perspectives. A variety of theoretically supported activities (CSEP) to experience short-term benefits of exercise are included in the lab. Redeveloped the course (1998-99, 02-03). The course requires each instructor to supervisor and coordinator the labs for their teaching term: 2002-03, 2014-15, 17W 19-21W.

¹³ A signature learning experience. Students often state KNES433 is one of the hardest courses they have taken; in the same breath they will say it is the best applied course of their undergrad. Most common quote "you changed my way of thinking." A course such as this –is unmeasurable and creates sustainability as it just keeps on giving to the individual, their family, etc. thereby decreasing the health burden.

¹⁸ In October 2023, the CSEP Annual Conference (Bridging Exercise and Practice) occurred in Calgary Alberta. It was the first sold out CSEP conference and many consider it to be best CSEP conference in recent history. It was a privilege to be the conference chair and be so well supported by the Kinesiology committee. Particularly wonderful was having a grad of our KNES program, cross-country Olympian Jesse Cockney (Inuit) as the dinner speaker.

¹⁹ As a Vice-chair of the Strategy committee, I focused on vision and strategic planning related to **fund raising and partnerships**. The CEO, management team and a competent board successfully built and opened several Ys: South Health Campus Y in partnership with Alberta Health Services in a hospital; and Genesis Centre, a combined partnership with the Community and the Calgary Public Library. The Y was selected by the City of Calgary to operate three new large health, wellness and recreation community facilities with a construction cost of \$447 million; Remington Y, 2016 and Rocky Ridge Y 2018 and Seton Y 2019. These facilities (300,000 sq. ft.) are the largest health and wellness centre YMCAs in the world.

²⁰ As Chair of the BODs at West Island College (WIC), a private school in Calgary, I brought a focus of higher education. This tenure included the selection of a new head of school, Ms. Carol Grant-Watt. Together, with her leadership, we successfully achieved the college's accreditation as an Independent School (CAIS school) in 2013.

²¹ During my president role of the APHA, which afforded many opportunities to interact with government including contentious situations, I realized that the best way forward was to find an individual who would be supported by their faculty Dr. Lindsay McLaren (2014-18). Dr. Christine Friedenreich (cancer epidemiologist), stated March 24, 2024 "You have always been a beacon of light focusing attention on public health within the Faculty of Kinesiology. I know that it has often been lonely for you to do so, however, your perseverance and commitment have been remarkable and laudable."

Subject: Request for Academic Reference- Mary B. Jordan Scholarship

Dear Dr. DB,

It was so great seeing you on Tuesday! I'm currently applying for the Mary B. Jordan YVR scholarship and was wondering if you would be able to provide an academic reference.

Not only did KNES 433 cultivate a bigger picture understanding of the relationship between physical activity and healthcare, it challenged my academic capabilities and provided meaningful insight into my personal values—which ultimately enhanced my intellectual curiosity. I believe your judgement on my writing ability, research skills, and inclusive perspective, as demonstrated through my PHR would make a significant contribution to my application.

The Mary B. Jordan YVR scholarship supports women in pursuit of a Master's degree in a business-related program in British Columbia, [here](#) is more information.

If you are able to support my application, I would be happy to provide more information, like my CV, academic transcripts, personal statement, PHR, and other written works. **The scholarship deadline is June 25th 2024 (11:59pm PDT).**

Please let me know if you require any further information, or if you have any specific procedures for submitting references.

Thank you for your time and consideration,

Minjing Li (MJ)

Still the most insightful course I ever took - thanks Dr. DB for everything you did for undergrads with this course. Easily one of the first courses I think about whenever I consider how my undergrad has assisted my own health and my current work as a practitioner and grad student
