STATISTICAL SOFTWARE SKILLS

Inventor of the PROCESS macro for SPSS, SAS and R that is widely used in many disciplines to simplify mediation, moderation, and conditional process analysis. Freely available from www.processmacro.org

SPSS (including custom macro and script programming using MATRIX), SAS (including custom macro programming using PROC IML), R, MPLUS, STATA, HLM, GAUSS. Comfort with modern methods of data analysis including multilevel modeling, latent growth modeling, structural equation modeling, applications of the general linear model, and resampling methods of inference.
